How An Interior Designer Can Help You

Most people are hesitant to call and hire an Interior Designer. They don't understand how a designer works, what we do, what we charge or exactly how we can help in decorating their home. It is my hope that by the end of this page, your questions will be answered, and you will feel more comfortable in hiring someone to help you with any of your interior design and decorating needs.

WHO Are Interior Designers? Why Should I Hire One?

I can buy my own furniture, choose my own wallpaper. Interior Designers want to buy everything new and do away with everything that is me. Interior Designers are only for the rich...Does this sound familiar?

Why indeed should one spend time and money to hire an interior designer when so much is available to you the shopper to put together yourself? The answer is quite simple. The largest expenditure any family makes after the purchase of a home is the expense of filling that home up, changing it, and adding personal touches.

An Interior Designer is a trained Professional who is qualified by education, experience, and examination and should save you time, money and costly mistakes in decorating your home. They are problem solvers and helpers in completing the decorating of your interiors.

WHAT ARE SOME OF THE THINGS AN INTERIOR DESIGNER DOES?

- Color Coordination of any Fabrics, Flooring, Paint, or Finishes
- Theme, Mood & Style Creation and Coordination
- Furniture Layout and space planning
- Window & Wall Treatments
- Bedding & Accessories
- Bathrooms/Kitchens
- Scaled Drawings/Blueprints
- Art & Antique selections & Placement
- Flooring/Closets/Cabinetry
- Interior Architectural Finishes

And the list goes on. A Designer also has all the resources to select, purchase and install any product or service that you may need. As an example, purchasing a wallpaper on your behalf, having it installed by a qualified installer. An Interior Designer is your personal Project Manager for what ever you hire them for.
